

Pack Leader ELF-50

Simple & Effective Business Solutions

The Pack Leader ELF-50 labeller is designed for wrap-around applications. At only 1m long, it is a flexible package able to be used on a bench for small runs or set up with a trolley and infeed table for a small scale, semi-automatic labelling system.

The Pack Leader ELF-50 is easy to set up, maintain and run and can be used for labelling onto most round containers including bottles or cans, wet, dry, empty or full – a convenience not found with heavier, more elaborate labelling machines.

- Hand wheels provide simple adjustments and enable quick set up and easy changeover.

- Made with durable 304 stainless steel and anodized aluminium.

- Manual position setting ensures your labels are placed accurately on the product, each and every time.

- Estimated 20 Labels per minute (Customers have experienced up to 38 UPM with beer can labelling).

- Supplied with SICK UFN3-70B413 Sensor which is suitable for Clear, Standard & Metalized labels.

- Hot Foil Coder (Batch Code / Use By Date Stamp) available (optional module).

Packserv is Australia's largest packaging equipment hire & service company with over twenty five years of experience. Regardless of your packaging requirements, Packserv will be able to tailor a unique solution to ensure your organisations production quality & efficiency obligations are met.
